

F-Connector/RG6 Splitters

The 30-15XX series of splitters represent passive products designed for higher frequency operation in international cable distribution systems. Printed circuits and special ferrite core material guarantee minimal insertion loss and optimal isolation and return loss up to 1 GHz. The series provides:

- 30 dB EMI performance by soldering the back cover to the case
- 100 dB EMI performance by employing a tongue and groove mating of case and back cover

Features

- High Quality Zinc Diecast Case
- Anticorrosive Nickel Finish
- Multiple Capacitor Design For Improved Response
- Includes Mounting Screws
- Precision Machined Threads
- CE approved
