

2-Gang Split Plate w/ Flex Opening

"Feature Sheet"

P/N: 45-0027-UWH

The DataComm 2-Gang Flex Split Plate provides a simple, professional solution for managing low-voltage cables behind flat panel TVs, entertainment centers, and wall-mounted displays. Designed with a flexible opening that splits into two sections, this plate allows for easy pass-through of HDMI, coaxial, speaker, or network cables without the need for additional connectors or couplers. The split design makes installation quick and convenient—no need to disconnect pre-terminated cables—while maintaining a clean, finished appearance. Ideal for both new construction and retrofit applications, the 2-Gang Flex Split Plate offers a low-profile design that blends seamlessly with standard Decora-style wall plates, providing a neat, organized cable exit point for any Audio/Video or networking setup.

Key Features:

- Split Flex Opening – Easily pass pre-terminated cables through the wall without disconnecting ends.
- Flexible Material – Protects cables while providing a snug, organized fit around multiple wire types.
- Clean Appearance – Hides low-voltage cable openings for a professional, finished look.
- Easy Installation – Mounts to any standard low-voltage mounting bracket or retrofit ring.
- Versatile Use – Ideal for HDMI, coaxial, speaker, or data cables in home theater and networking setups.
- Decora-Style Design – Compatible with standard Decora wall plates for a coordinated installation.
- Available in Lite Almond (LA), and Ultra White (UWH)
