

Instruction/Installation Sheet
Cable Clip
Part #45-0103

Parts Included:

- Cable Clip

Tools Needed:

- Drill or Hammer
- Wood Screws or Nails

Crafted for efficiency, this compact yet robust clip is designed to simplify your installations in new construction. Its design allows for easy mounting on a standard wood stud, using nails or screws. Simply position the clip and secure it in place to mark and hold your cables securely during rough-ins and through the construction process. Replace bulky rough-in brackets or boxes with DataComm's Cable Clip.
